In this workshop, you'll learn about natural pest control and the best plants to use in and around your garden to keep pests at bay. You'll have your hands in the dirt and sow, thin, and transplant seedlings to get a jumpstart on your garden plans. All attendees will go home with 4 trays (12 cells each) that you sow. Additionally, you will get a variety of more established plants that are in the thinning and transplant stages.

All supplies included, **PLUS** a free sample of **5Heart Premium Worm Castings!**
